AgriStability Operations Supervisor

Kelowna, B.C.

An opportunity to showcase your analytical and financial abilities while providing financial stability to British Columbia farmers

****Application deadline: February 10, 2012****

Weather hazards, natural disasters, diseases, pests and market declines pose significant risks to farmers. The Business Risk Manager Branch's mission is to help farmers and farm organizations mitigate these uncertainties by proactively offering a number of innovative, high-quality programs and risk management products including production insurance, income stabilization and wildlife damage compensation.

The Operations Supervisor supervises and successfully coordinates AgriStability application verification, benefit determinations and client services, with a concentration on cattle, forage, grains and oil seeds commodities. You are a results-focused individual with effective communication skills, who's able to establish and promote collaboration and communication linkages within and between operations teams as you work closely with agricultural sector representatives and a diverse group of stakeholders and producers. Along with farm accounting and financial experience, you bring a solid understanding of business risk management programs to this key role. A skilled supervisor, you oversee and provide expertise to the operations team, establishing superior quality assurance processes and the advancement of excellent customer relations. Highly organized and team-oriented, you have the initiative this high-profile role requires to ensure that accurate and timely AgriStability benefits support the continued viability of farm operations in British Columbia.

For complete details on this role and to apply online by February 10, 2012, please visit:
