

PROCEEDINGS

**National Conference
on Agricultural Nutrients and Their Impact
on Rural Water Quality**

**April 29 to 30, 2002
The Waterloo Inn
Waterloo, Ontario**

**Hosted by the
Agricultural Institute of Canada Foundation**

Sponsors

Ministry of the Environment
Ministère de l'Environnement

Ministry of Agriculture, Food and Rural Affairs
Ministère de l'Agriculture, de l'Alimentation et des Affaires rurales

Ducks Unlimited Canada

ONTARIO PORK

PIONEER®

OSCIA

**The National Conference on Agricultural Nutrients and Their Impact on Rural Water Quality
was hosted by the Agricultural Institute of Canada Foundation**

Technical Program Committee

Brenda Machin, PAg, Agricultural Institute of Canada Foundation, Conference Co-Chair

Sandy Todd, PAg, Agricultural Institute of Canada Foundation, Conference Co-Chair

Jean Sullivan, PAg, Agricultural Institute of Canada Foundation

Régis R. Simard, PhD, University of Manitoba, Department of Soil Science

Patricia Chambers, PhD, National Water Research Institute

Elizabeth Roberts, MSc, Environment Canada, National Guidelines and Standards Office

Tom W. Bruulsema, PhD, CCA, Potash and Phosphate Institute of Canada

Shane Gabor, MSc, Ducks Unlimited Canada's Institute for Wetland and Waterfowl Research

Susan Humphries, Ontario Ministry of Agriculture Food and Rural Affairs, Environmental Management

Erik Apedaile, PAg, Consultant

John Pries, CH2M HILL Canada Limited

Acknowledgements

The Agricultural Institute of Canada Foundation gratefully acknowledges the financial support received from the following organizations:

Agriculture and Agri-Food Canada

Canadian Fertilizer Institute

Environment Canada

Ducks Unlimited Canada

Ontario Federation of Agriculture

Ontario Institute of Professional Agrologists

Ontario Ministry of Agriculture and Food

Ontario Ministry of the Environment

Ontario Pork

Ontario Soil and Crop Improvement Association

Pioneer Hi-Bred

Potash and Phosphate Institute of Canada

Table of Contents

- 10 **Managing Agricultural Nutrients for Agronomic and Environmental Benefits to Society: It Is Possible**
Jeff Schoenau, PhD, PAg, University of Saskatchewan Department of Soil Science and Owner/Operator of an 800 ha Grain Farm
- 11 **Nutrient Balance in Canadian Agriculture: A Threat to Water Quality?**
Tom W. Bruulsema, PhD, CCA, Potash and Phosphate Institute of Canada
- 12 **Nutrient Losses from Agriculture: Effects on Aquatic Ecosystems in Canada**
Patricia Chambers, PhD, National Water Research Institute
- 13 **Innovative Approaches to Reduce Nutrient Losses and Improve Water Quality**
Craig F. Drury, PhD, Agriculture and Agri-Food Canada, Greenhouse and Processing Crops Research Centre
- 14 **Manure and Fertilizer Management in the Great Lakes–St. Lawrence River Basin: Evaluating the Federal Government’s Performance**
Peter Morrison, PhD, Director of the Commissioner of the Environment and Sustainable Development

Nitrates in Groundwater

- 15 **Potato Production in Relation to Concentrations of Nitrate in Groundwater: Current Trends in PEI and Potential Management Changes to Minimize Risk**
John MacLeod, PAg, J. Brian Sanderson, MSc, PAg, and Allan J. Campbell, Agriculture and Agri-Food Canada, Crops and Livestock Research Centre; George H. Somers, PEI Department of Fisheries, Aquaculture and Environment
- 22 **Impact on Water Quality From Agricultural Practice in Urban-Rural Well Fields: Influence of Time Delay in the Vadose Zone**
David Rudolph, PhD, PEng and Will Robertson, University of Waterloo, Department of Earth Science; Greg Padusenko, Tim Lotimer and Tony Lotimer, Lotowater Ltd.
- 23 **Relationship Between Groundwater Nitrate Concentrations to Cropping Rotations and Farm Income**
M. Cathy Ryan, PhD, PGeol, PEng, University of Calgary, Department of Geology and Geophysics; N. Stokman, Middlesex Soil and Crop Improvement Association
- 24 **Ontario’s Nitrogen-index: A Tool for Nutrient Management Efficiency and Groundwater Protection**
Stewart Sweeney, PhD, Ontario Ministry of Agriculture and Food

Monitoring Our Progress

- 25 **A Framework for Monitoring Stream Health**
Chris Jones, Nottawasaga Valley Conservation Authority
- 26 **The Rural Water Quality Testing Program**
Mary-Jane Conboy, PhD, Ontario Federation of Agriculture
- 27 **Nova Scotia’s Agricultural Water Quality Research Program: Drainage Water Nitrate-Nitrogen Monitoring**
Robert J. Gordon, PhD, Ali Madani and Glenn Stratton, Nova Scotia Agricultural College; Department of Engineering; Laurie Cochrane, Nova Scotia Department of Agriculture and Fisheries; Vernon Rodd, Agriculture and Agri-food Canada
- 28 **Water Quality in Southern Alberta: Issues and Initiatives**
Joanne L. Little, MSc, Sandi Riemersma and Gerald Ontkean, Alberta Agriculture, Food, and Rural Development; Karen Saffran, Alberta Environment, Air and Water Branch

Agric-Environmental Indicators: Assessing Our Performance

- 29 **Role and Nature of Agri-Environmental Indicators in Canadian Agricultural Policy**
Terence McRae, MA, Agriculture and Agri-Food Canada
- 30 **Indicators of Risk of Water Contamination by Phosphorus**
Isabelle Royer, Agriculture and Agri-Food Canada
- 31 **Risk of Water Contamination by Nitrogen: One of the National Agri-Environmental Indicators**
K. Bruce MacDonald, PhD, Consultant
- 33 **Linking Economic and Environmental Modeling for Water Quality Policy Development and Impact Assessment**
Samuel Gameda, PhD, Agriculture and Agri-Food Canada, Land Quality Modeling

Effects of Livestock Operations on Water Quality

- 34 **The Dunging Dilemma**
Karen Bolton, MA, PAg, Russell Johnson, MSc, PEng, and Lisa White, PEng, Saskatchewan Agriculture, Food and Rural Revitalization
- 44 **Impacts of Grazing on Runoff and Water Quality**
David Chanasyk, PhD, PAg, PEng, FAIC, FCSSS, and E. Mapfumo, University of Alberta, Renewable Resources; Walter D. Willms, Agriculture and Agri-Food Canada
- 45 **An Impact Assessment on Groundwater and Surface Water at a Large Beef Operation in Southwestern Ontario and Resulting BMP Recommendations**
Tiffany Svensson, MSc, Water and Earth Science Associates Ltd.
- 47 **Swine Manure Compost Increases Substantially Soil Phosphorus Losses Through Surface Runoff and Tile Drainage Leaching**
Tiequan Zhang, PhD, Chin S. Tan, Craig F. Drury, J.D. Gaynor, W.D. Reynolds and T.W. Welacky, Agriculture and Agri-food Canada, Greenhouse and Processing Crops Research Centre
- 48 **Environmental Considerations for Subsurface Drainage on Livestock Farms**
Donald Lobb, PAg, Land Improvement Contractors of Ontario
- 52 **Manure Impact on the Field Movement and Survival of Enteric Bacteria**
Adrian Unc, PhD, and Michael J. Goss, PhD, University of Guelph, Department of Land Resource Science

Monitoring Our Progress

- 53 **Relating Water Quality to Land Use in Southern Alberta**
Karen Saffran, Alberta Environment, Air and Water Branch; Livio Fent, Alberta Sustainable Resource Development, Public Lands Division; Joanne Little, Alberta Agriculture, Food and Rural Development, Irrigation Branch
- 54 **Bacterial Analysis of Inshore Surface Waters of Southeastern Georgian Bay**
Kimberley Schiefer, University of Guelph, Department of Land Resource Science; Michael J. Goss, PhD, University of Guelph, Department of Land Resource Science; Roy Schatz, The Georgian Bay Association Foundation
- 64 **Impacts of Soil Conservation on Water Quality**
Gregory Wall, Trevor Dickinson, PEng, D. King and R. Rudra, University of Guelph, Soil Resources Group
- 67 **Alberta Environmentally Sustainable Agriculture (AESAs) Long-term Surface Water Quality Monitoring Program**
James J. Wuite, Sandra E. Cooke, N. Carle and R. David Neilson, Alberta Agriculture, Food, and Rural Development
- 68 **Impacts of Long Term Tillage Practices on Water Quality**
Rikke Dam, Chandra A. Madramootoo and G.R. Mehuys, McGill University, Brace Centre for Water Resources Management
- 81 **Nitrate Leaching and Nitrous Oxide Emissions Under Irrigation and Drainage Systems**
Abdirashid A. Elmi, Chandra A. Madramootoo and C. Hamel, McGill University, Department of Natural Resource Science

Improving Water Quality...Naturally

- 82 **The Importance of Wetlands and Upland Conservation Practices for Source Water Protection**
T. Shane Gabor, MSc, Lisette C.M. Ross, Henry R. Murkin, Ducks Unlimited Canada's Institute for Wetland and Waterfowl Research; James S. Anderson, Ducks Unlimited Canada
- 83 **Taking an Integrated Approach to Natural Heritage Conservation**
Barbara Veale and Wayne MacMillan, Grand River Conservation Authority
- 85 **Buffers: Past, Present and Future**
Mike McMorris, Ontario Cattlemen's Association
- 86 **Agricultural Nutrient Inputs to Wetlands Alter Water Quality and Carbon Sink Potential**
Rhonda McDougal, PhD, Ducks Unlimited Canada's Institute for Wetland and Waterfowl Research
- 87 **Environmental Impact on Surface and Ground Water of Low Density Winter Paddock in Cow-Calf Raising**
André d'Astous, Gilles Fortin and Mark Somers, Envir-Eau Inc.; Anne-Marie Christen, Fédération des Producteurs de bovins du Québec, Union des Producteurs Agricole
- 88 **Role of Riparian Zones in the Attenuation of Nitrates in Agricultural Landscapes in Southern Ontario**
Ramon Aravena, PhD, David Rudolph and Sherry Schiff, University of Waterloo, Department of Earth Sciences

Managing Crops and Livestock to Reduce Environmental Risk

- 89 Prediction of Nitrogen Mineralization in Farm Fields**
Dean Barry, PhD, Michael J. Goss, PhD, Jennifer L. Forkes and David Millman, University of Guelph, Centre for Land and Water Stewardship; Huang Jianguo, College of Natural Resources and Environment, Southwest Agricultural University
- 96 Impact of Cultural Practices on Water Quality**
Gordon M. Barnett, Agriculture and Agri-Food Canada, Dairy and Swine Research and Development Centre; Simon P. Guertin, IRDA Inc.; Georges Gangbazo, Ministère de l'Environnement, Direction des politiques du secteur municipal
- 114 Partners In Nitrogen Use Efficiency: The Monitoring of Nutrient Flows and the Assessment of BMPs on Five Farming Operations in Waterloo Region**
Shawn Burr, MSc, Michael J. Goss, PhD, and Gary Parkin, University of Guelph, Department of Land Resource Science; Kevin McKague, PEng, Ontario Ministry of Agriculture, Food and Rural Affairs; Mary Jane Conboy, PhD, Ontario Federation of Agriculture
- 115 Considerations for a Proposed Farm Bylaw for the Chilliwack Municipal Wellhead Protection Zone and Protection of the Sardis-Vedder Aquifer**
Kim Sutherland, MSc, PAg, BC Ministry of Agriculture, Food and Fisheries
- 129 Application and Evaluation of NMAN as a Tool for Identifying Field BMPs to Improve the Nitrogen Use Efficiency of PINUE Farms**
Kevin McKague, PEng, Ontario Ministry of Agriculture and Food; Mary Jane Conboy, PhD, Ontario Federation of Agriculture; Shawn Burr, University of Guelph, Department of Land Resource Science

Managing Nutrients Through Legislation and Policy

- 140 Agriculture Policy Framework**
Terence McRae, MA, Agriculture and Agri-Food Canada
- 141 Managing Manure Nutrients Through Legislation and Policy in Manitoba**
Petra Loro, MSc and Brian English, Manitoba Agriculture and Food, Animal Industry Branch; Al Beck, Manitoba Conservation
- 143 The Proposed Nutrient Management Legislation in Ontario**
Maxine Kingston, Ontario Ministry of Agriculture and Food
- 144 Phosphorus Limits for Agricultural Land in Alberta**
Brent Paterson, PAg, Alberta Agriculture Food and Rural Development

Treatment Options

- 145 The Performance of a Free Water Surface Constructed Wetland in the Treatment of Farmstead Runoff**
Anna Crolla, MSc, and Christopher B. Kinsley, MEng, PEng, Ontario Rural Wastewater Centre, Collège d'Alfred of the University of Guelph
- 153 Evaluation of Water Quality Parameters in an Agricultural Constructed Wetland Treatment System In Cold Climates**
Erin L. Smith, Robert J. Gordon, Ali Madani and Glenn Stratton, Nova Scotia Agricultural College
- 154 Feedlot Stormwater Runoff Treatment Using Constructed Wetlands**
John Pries, CET, CH2M HILL Canada Limited; Patrick McGarry, Prairie Farm Rehabilitation Administration
- 163 The Role of Wetlands in Water Protection in Agricultural Landscapes**
Barry G. Warner, PhD, PWS, University of Waterloo, Wetlands Research Centre
- 164 Field Scale *In Situ* Denitrification Within a Municipal Water Supply Aquifer**
Richard Gierczak and J.F. Devlin, University of Waterloo, Department of Earth Science

Managing Crops and Livestock to Reduce Environmental Risk

- 165 A Survey on the Current Status of Nutrient and Water Recirculation in Ontario's Greenhouses**
Stefan Richard, Youbin Zheng and Michael Dixon, University of Guelph, Department of Plant Agriculture
- 166 Reservoir-irrigation System Improves Water Quality and Increases Crop Production**
Chin S. Tan, Craig F. Drury, W.D. Reynolds, Tiequan Q. Zhang and J.D. Gaynor, Agriculture and Agri-Food Canada, Greenhouse & Processing Crops Research Centre
- 167 BMPs for Water Quality Protection in Semi-arid, Agricultural Ecosystems**
Sandi Riemersma, Joanne Little and Gerald Ontkian, Alberta Agriculture, Food, and Rural Development

- 168 Livestock Manure Treatment Technologies: Environmental Impacts**
Bruce Bowman, PhD, CARC Expert Committee on Manure
- 170 Phosphorus Dynamic in Agricultural Production, Terrestrial and Aquatic Systems: The Pike River Case Study**
Aubert R. Michaud, MSc, Institut de recherche et développement en agroenvironnement, Québec; Julie Deslandes, Université de Sherbrooke, Centre d'applications et de recherche en télédétection; Peter Enright, Université McGill, Département de génie des biosystèmes et le Centre Brace pour la gestion des ressources hydriques; Richard Lauzier, Ministère de l'Agriculture, des pêcheries et de l'alimentation du Québec, Direction régionale de la Montérégie, Secteur Est

Incentives and Programs to Improve Rural Water Quality

- 171 A Conservation Cover Incentive Program for Canada**
Brian T. Gray, PhD, Ducks Unlimited Canada's Institute for Wetland and Waterfowl Research
- 172 Facilitating Community Consensus: Large Livestock Operations and the Challenge for Rural Municipalities**
Wayne J. Caldwell, PhD, MCIP, PPI, and Scott Tousaw, MA, MCIP, RPP, Huron County Planning and Development Department
- 183 Cost Implications of Alternative Land Retirement Schemes in Multiple Watersheds**
Wanhong Yang, PhD, University of Guelph, Madhu Khanna, Richard Farnsworth and Hayri Onal, University of Illinois, Department of Agricultural and Consumer Economics
- 201 Phosphorus Management Strategy in the South Nation River Watershed**
Mary-Ann Wilson and Leslie Vanclief, South Nation Conservation
- 202 Agro-environmental Clubs: The Quebec Approach to NMPs... and Beyond**
Hugh Maynard, Quebec Farmers' Association

Treatment Options

- 204 An Adsorptive Phosphorus Filter — Column and Pilot Studies**
Christopher B. Kinsley, MEng, PEng and Anna Crolla, MAsc, Ontario Rural Wastewater Centre, Kimberly Cameron, MAsc, and Chandra Madramootoo, PhD, PEng, McGill University, Brace Centre for Water Resources Management
- 213 Evaluation of a Science-based Alternative Management Practice for the Treatment of Farmyard Runoff and Milk House Waste**
Tracy McMunn, David Rudolph, PhD, PEng, Will Robertson, PhD, and Carol Ptacek, PhD, University of Waterloo, Department of Earth Sciences
* and National Water Research Institute, Environment Canada*
- 222 The Adoption of Ecologically Innovative Technology in Small-scale Agriculture**
Gregory Rose, MSc, University of Waterloo, School of Planning
- 237 A Composting System for Liquid Manure**
Ron Fleming, PEng, and Malcolm MacAlpine, Ridgetown College - University of Guelph
- 243 Low Temperature Anaerobic Digestion for the Treatment of Swine Manure Slurry**
Daniel Massé, PhD, Agriculture and Agri-Food Canada, Dairy and Swine Research and Development Centre

Community-based Initiatives Towards Improved Water Quality

- 245 Community Perceptions and Farm Realities: The Bruce County Experience**
Tony Morris, Agricultural Environmental Stewardship Initiative, Bruce County Federation of Agriculture
- 246 The Rural Water Program: Lessons Learned**
Tracy Ryan, MSc, Grand River Conservation Authority
- 247 Severn Sound Environmental Association — Transition from Government to Community Based Ownership**
Keith Sherman, Severn Sound Environmental Association
- 248 Streambank Stewardship: Grazing Management to Maintain Riparian Health**
Etienne Soulodre and Tom Harrison, Saskatchewan Wetland Conservation Program

Integrity of Drinking Water

- 249 Best Management Practices for Controlling Nutrients: Reflections on Nutrient Management Planning and the Walkerton Tragedy**
Michael J. Goss, PhD, and Dean A.J. Barry, PhD, University of Guelph, Centre of Land and Water Stewardship

- 256 Surface Water Taste and Odour: Chemistry, Biology and Socio-economic Impacts**
Susan B. Watson, PhD, National Water Research Institute, Environment Canada
- 257 Effect of Agricultural Land Use Practices on Nitrate Contamination in the Abbotsford Aquifer**
Gary Grove, MSc, National Water Research Institute; Basil Hii, Environment Canada, Pacific and Yukon Region
- 258 Building Local Capacity to Provide Clean Water**
Rob de Loe, PhD, University of Guelph, Department of Geography

Innovation and Technology

- 259 A Two-storey Hog Barn: An Innovative Approach to Manure Management**
Ron Fleming, PEng, and Malcolm MacAlpine, Ridgetown College – University of Guelph
- 263 Impact of Improved Animal Performance on Nutrient Output**
Douglas Yungblut, Pioneer Hi-Bred
- 264 Nutritional and Management Approaches to Reduce Phosphorus Excretion in Swine Manure**
Michel Vignola, Agr, MSc, Shur-Gain Québec, M.L. Foods; Candido Pomar, Agriculture and Agri-Food Canada
- 266 The Effect of Biological Treatment on Greenhouse Gas Emissions and Other Environmental Impacts from Livestock Wastes**
Colin H. Burton, PhD, Silsoe Research Institute, UK

Closing Plenary

- 267 How the Challenge of Abundance will Impact Future Nutrient Management**
Gord Surgeoner, PhD, President, Ontario Agri-Food Technologies

Posters

- 268 Clean Water Program for the South Nation Watershed**
Ronda Boutz, South Nation Conservation
- 269 Manure Utilization by the Potato Crop and Implications to Ground Water Quality**
Allan J. Campbell and John A. MacLeod, Agriculture and Agri-Food Canada
- 273 Compiling Information Sources to Evaluate Land Use and Water Quality in Matsqui and Gifford Sloughs**
George Derksen, Environment Canada; Bev Anderson, Ministry of Water, Land and Air Protection; Ted Van der Gulik and Stacy Meech, BC Ministry of Agriculture, Food and Fisheries
- 274 Impact of Field Application of Hog Manure on Surface Runoff Water Quality**
Jane Elliot, National Water Research Institute; Charles Maulé, University of Saskatchewan, Department of Agricultural and Bioresource Engineering
- 280 South Nation Watershed Water Quality Study**
Gordon Garlough and Leslie Vanclief, South Nation Conservation
- 281 Silage Corn Fertilization and Harvest Management in Newfoundland**
Allan Kwabiah, Agriculture and Agri-food Canada, Atlantic Cool Climate Crop Research Centre
- 282 Tillage Effects on Surface and Subsurface Runoff from Manured Land**
Joanne L. Little, MSc and D. Rodney Bennett, Alberta Agriculture; Agriculture and Agri-Food Canada, Lethbridge Research Centre
- 283 Fall Cover Crops for Reducing Nitrate Loss**
John A. MacLeod, PAg and J. Brian Sanderson, MSc, PAg, Agriculture and Agri-Food Canada, Crops and Livestock Research Centre
- 293 Monitoring Nitrate Leaching from Fields in Potato Rotation**
John A. MacLeod, PAg and J. Brian Sanderson, MSc, PAg, Agriculture and Agri-Food Canada, Crops and Livestock Research Centre; P. Milburn, Potato Research Centre
- 296 The Influence of Tile Drains on Soil Transport Mechanisms**
Kerry-Anne Pumphrey, Richard J. Heck, and Gary Parkin, University of Guelph
- 297 Evaluation of Buffer Zones for Surface Water and Groundwater Quality Protection and Improvement in The Battersea Drain Watershed, Alberta**
Sandi Riemersma, Joan Rodvang, Joanne Little and Barry Olson, Alberta Agriculture, Food and Rural Development, Irrigation Branch

- 298 Treatment Options for Beef Feedlot Runoff in Alberta**
Sandi Riemersma, Alberta Agriculture, Food and Rural Development, Irrigation Branch; Bunny Mah, Prairie Farm Rehabilitation Administration
- 299 A Canadian Guidance Framework for Phosphorus in Freshwater Systems**
Elizabeth S. Roberts, MSc, Susan L. Roe, R. Fletcher, D.J. Spry, Pierre-Yves Caux, Environment Canada, National Guidelines and Standards Office
- 300 Proposed Canadian Water Quality Guidelines for Nitrate**
Elizabeth S. Roberts, MSc, J.D. Whall, Kelly L. Potter, and Pierre-Yves Caux, Environment Canada, National Guidelines and Standards Office
- 301 The Great Lakes Water Quality Agreement and Agricultural Land Use Practices in Lake Erie Basin of Southwestern Ontario**
Peter A. Roberts and Gord Grant, Ontario Ministry of Agriculture and Food
- 302 Maximizing Legume Nitrogen Use and Minimizing Nitrate Leaching**
J. Brian Sanderson, MSc, PAg, and John A. MacLeod, PAg, Agriculture and Agri-Food Canada, Crops and Livestock Research Center
- 310 Reducing the Impact of Chemicals from the Horticulture Industry on Water Quality**
Tom Somerville, Landscape Ontario Horticultural Trades Association
- 311 Reducing Agricultural Nutrients from Manured Grassland Using a Soil Aerator**
Laurens J.P. van Vliet, Shabtai Bittman, Navine Patni and Grant Kowalenko, Agriculture and Agri-Food Canada, Pacific Agri-Food Research Centre; George A. Derksen, Environment Canada, Environmental Protection Branch; Bev Anderson, BC Ministry of Water, Land and Air Protection
- 312 Alberta Environmentally Sustainable Agriculture (AESA) Long-term Surface Water Quality Monitoring Program**
James J. Wuite, Sandra E. Cooke, N. Carle, and R. David Neilson, Alberta Agriculture Food and Rural Development
- 313 Distribution and Trends for Nitrate in PEI Groundwater and Surface Waters**
Jim J. Young, George H. Somers and B.G. Raymond, PEI Department of Fisheries, Aquaculture and Environment
- 320 “How Well is Your Well?” A Sampling and Information Package for Owners of Private Wells**
Shawn Zentner, Region of Waterloo, Community Health Department
