

**Michael Faba**  
**Project Manager – Bioproducts AgSci Cluster Initiative**  
**Bioindustrial Innovation Canada**

Michael is Senior Project Manager at Bioindustrial Innovation Canada (BIC), located in Sarnia, ON. After spending his early career in Research and Operations roles at a multi-national polymer manufacturing company, Michael transitioned to work to develop the Canadian bioeconomy with BIC in 2016. His primary role is managing the Bioproducts Agriscience Cluster. Funded by Agriculture and Agri-food Canada (AAFC) through the Canadian Agricultural Partnership, the Bioproducts Cluster is a pre-commercial research program focused on the development of industrial bioproducts and related technologies with a benefit to the Canadian agricultural sector. Michael holds both a B.Sc.E in Engineering Chemistry and M.Sc in Chemical Engineering from Queen's University.
