

Dr. Sylvain Moreno

Scientific Director of the B.C. Centre for Agritech Innovation, Associate Professor, School of Interactive Arts and Technology at Simon Fraser University

Sylvain Moreno is the founder and Scientific Director of the B.C. Centre for Agritech Innovation, the founder of the Circle Innovation model and an Associate Professor at Simon Fraser University. Dr. Moreno is also a member of BC's Agriculture and Food Minister's Advisory Group on Regenerative Agriculture and Agritech (RAA), a group developing a Regenerative Agricultural Network to create jobs, opportunities for farmers and greater food security by bringing together natural systems of production with agri-technologies. He holds a doctorate in cognitive neuroscience from the University of Mediterranean in France.

Dr. Moreno is an expert in ecosystem innovation. He has been the recipient of many awards from national and international organizations such as the [2021 ISSIP Excellence in Service Innovation Award](#) and The Brainstorm Innovation Prize from Stanford Medical School (2017). His work has received widespread press in various media outlets including The New York Times and Forbes. He has authored several scientific publications and patents with real-world impacts in education and clinical environments.
